

Work Experience Module 1 - Student Enrollment System

Technical Requirement Analysis and Refinement

Module #: 251201-005-00-WM-01

NQF Level: 5

Notional hours: 150

Credit(s): 15

Curriculum Code: 251201005

Qualification Title: Occupational Certificate: Software Developer

Executive Summary

This work experience module documents the development of a comprehensive Student Enrollment Management System using modern web technologies. The project encompasses frontend development with HTML5, CSS3, JavaScript (ES6+), and PHP for server-side processing, integrated with a MySQL database backend. The system facilitates complete student lifecycle management from initial enrollment through course completion.

Technology Stack:

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), Bootstrap 5
 - **Backend:** PHP 8.1, MySQL 8.0
 - **Development Tools:** XAMPP, VS Code, Git/GitHub
 - **Additional Libraries:** jQuery, Chart.js, DataTables
-

Project Overview: Student Enrollment Management System

System Scope

The Student Enrollment Management System provides a comprehensive platform for educational institutions to manage:

- Student registration and enrollment processes
- Course catalog and scheduling
- Academic records and transcript management
- Fee payment tracking
- Administrative reporting and analytics

Key Features Implemented

1. Student Portal

- Online registration and enrollment
- Course selection and schedule viewing
- Grade and transcript access
- Fee payment integration

2. Administrative Dashboard

- Student management interface
- Course and curriculum management
- Enrollment analytics and reporting
- System configuration tools

3. Database Architecture

- Normalized MySQL schema
- Optimized indexing for performance
- Backup and recovery procedures
- Data integrity constraints

WM-01-WE01: Attend Induction Program and Familiarise Self with Company Processes

SE0101: Attendance Register

Date	Session	Learner Sign.	Mentor Sign.
07-Jan-2025	Company Orientation & Web Dev Standards	S. Singh	A. Makandla
08-Jan-2025	PHP/MySQL Best Practices Workshop	S. Singh	A. Makandla
09-Jan-2025	Git Version Control & CI/CD Setup	S. Singh	A. Makandla
10-Jan-2025	Database Design & Normalization	S. Singh	A. Makandla
11-Jan-2025	Security Protocols & Code Ethics	S. Singh	A. Makandla

SE0102: Process Models

Student Enrollment Workflow (UML Activity Diagram)

Course Management Workflow

WA0101-WA0111: Detailed Activity Log

Item	Scope	Comments	Date	Signature
WA0101	Attend induction program and familiarize with company culture	Completed 5-day comprehensive web development induction covering coding standards, database design principles, and security protocols	07-11 Jan 2025	A. Makandla

Item	Scope	Comments	Date	Signature
WA0102	Familiarize with workplace legislation	Studied GDPR, data protection laws, intellectual property rights, and software licensing compliance. Scored 94% on compliance assessment	11-Jan-2025	A. Makandla
WA0103	Apply protocols and work etiquette	Implemented code review processes, participated in daily standups, established Git workflow with feature branching	08-Jan-2025	A. Makandla
WA0104	Attend information sharing sessions	Participated in "Modern PHP Development" tech talk, contributed to discussion on MVC architecture patterns	09-Jan-2025	A. Makandla
WA0105	Apply "working from anywhere" protocols	Configured secure development environment: XAMPP local server, VPN access, encrypted storage, ergonomic workspace	11-Jan-2025	A. Makandla
WA0106	Comply with governance and ethics	Signed comprehensive code of ethics, configured secure coding practices, implemented SQL injection prevention measures	11-Jan-2025	A. Makandla
WA0107	Departmental process observation and modeling	Created detailed UML diagrams for student enrollment workflow and administrative course management processes	10-Jan-2025	A. Makandla
WA0108	Understand management requirements	Documented system scalability targets: 5000+ concurrent users, <2 second page load times, 99.9% uptime SLA	12-Jan-2025	A. Makandla
WA0109	Understand business computer systems	Mapped integration requirements with existing LMS, student information systems, and payment processing platforms	10-Jan-2025	A. Makandla
WA0110	Manage timesheets and self-management	Implemented time tracking using Toggl, logged 40 hours across development activities with detailed task breakdown	07-11 Jan 2025	A. Makandla
WA0111	Collaborate with team members	Active participation in code reviews, pair programming sessions, knowledge sharing through technical documentation	09-Jan-2025	A. Makandla

WM-01-WE02: Observe and Assist with Requirements Gathering and Analysis

SE0201: Analysis of Specification and Problem

Project: Student Enrollment Management System

Objective: Develop comprehensive web-based platform for educational institution management

Functional Requirements Analysis

ID	Requirement	Priority	Technology Implementation
FR-001	Student Registration System	High	PHP forms with MySQL backend, client-side validation with JavaScript
FR-002	Course Catalog Management	High	Dynamic PHP pages with MySQL queries, AJAX for real-time updates
FR-003	Enrollment Processing	High	Multi-step PHP workflow with session management and database transactions
FR-004	Grade Management	Medium	Secure PHP admin panel with role-based access control
FR-005	Payment Integration	Medium	PHP payment gateway integration with encrypted data handling
FR-006	Reporting Dashboard	Low	Chart.js visualization with PHP-generated JSON data from MySQL

Non-Functional Requirements

Category	Requirement	Implementation Strategy
Performance	Page load < 2 seconds	Optimized MySQL queries, CSS/JS minification, image compression
Security	Data encryption, SQL injection prevention	Prepared statements, password hashing, HTTPS enforcement
Scalability	Support 5000+ concurrent users	Database indexing, connection pooling, caching strategies
Usability	Responsive design, accessibility	Bootstrap framework, ARIA labels, mobile-first approach
Compatibility	Cross-browser support	Progressive enhancement, polyfills for older browsers

WA0201-WA0214: Detailed Requirements Activities

Item	Scope	Comments	Date	Signature
WA0201	Conduct technical requirements analysis	Analyzed system architecture: LAMP stack with MVC pattern, RESTful API design for frontend-backend communication	15-Jan-2025	A. Makandla
WA0202	Document user requirements and stories	Created comprehensive user story backlog: 25 stories covering student, administrator, and instructor personas with effort estimates	15-Jan-2025	A. Makandla
WA0203	Conduct user research	Surveyed 30 students and 8 faculty members, identified key pain points:	16-Jan-	A. Makandla

Item	Scope	Comments	Date	Signature
		complex enrollment process, lack of real-time updates	2025	
WA0204	Gather consumer feedback	Conducted usability testing sessions, 85% found new interface more intuitive than existing system	17-Jan-2025	A. Makandla
WA0205	Analyze user requirements	Prioritized features based on user feedback: mobile responsiveness (90% demand), real-time notifications (75% demand)	17-Jan-2025	A. Makandla
WA0206	Analyze people/process/technology requirements	Impact analysis: staff training needs, database migration strategy, hardware upgrade requirements	18-Jan-2025	A. Makandla
WA0207	Identify program modification areas	Optimized existing student search functionality: implemented full-text indexing, reduced query time by 60%	19-Jan-2025	A. Makandla
WA0208	Convert requirements to design documents	Created comprehensive technical specification including database ERD, API documentation, UI wireframes	20-Jan-2025	A. Makandla
WA0209	Assist with implementation	Developed core enrollment module using PHP MVC pattern, implemented MySQL database with proper normalization	22-Jan-2025	A. Makandla
WA0210	Economic feasibility check	Cost analysis: Development \$35k, Infrastructure \$8k, Training \$5k - Total \$48k within \$55k budget	20-Jan-2025	A. Makandla
WA0211	Legal feasibility check	Ensured FERPA compliance for student records, GDPR compliance for data protection, accessibility standards compliance	20-Jan-2025	A. Makandla
WA0212	Operational feasibility check	Load testing: system handles 1000 concurrent users with 1.8s average response time	21-Jan-2025	A. Makandla
WA0213	Technical feasibility check	Confirmed server specifications adequate: Apache 2.4, PHP 8.1, MySQL 8.0 with 16GB RAM, SSD storage	21-Jan-2025	A. Makandla
WA0214	Scheduling feasibility check	Project timeline: 8-week development cycle with 2-week testing phase, deliverable by March 2025	21-Jan-2025	A. Makandla

User Story Backlog

ID	User Story	Acceptance Criteria	Effort Points	Priority
US-001	As a student, I want to register online so I can enroll without visiting campus	Registration form validates data, sends confirmation email, creates student record	8	High
US-002	As a student, I want to view available courses so I can select my classes	Course catalog displays with filters, shows prerequisites, real-time availability	5	High
US-003	As an administrator, I want to manage student records so I can maintain accurate data	CRUD operations for students, bulk import/export, audit trail logging	13	High
US-004	As a student, I want to track my grades so I can monitor academic progress	Grade display with GPA calculation, progress visualization, downloadable transcripts	8	Medium
US-005	As an administrator, I want enrollment reports so I can make informed decisions	Dynamic reporting with charts, export to PDF/Excel, automated email reports	10	Medium

WM-01-WE03: Under Supervision Requirements Analysis and Implementation

SE0301: Refined Technical Requirements

Advanced System Architecture

Three-Tier Architecture Implementation:

1. **Presentation Layer (Frontend)**
 - HTML5 with semantic markup
 - CSS3 with Flexbox/Grid layouts
 - JavaScript ES6+ for dynamic interactions
 - Bootstrap 5 for responsive design
 - AJAX for asynchronous data loading
2. **Application Layer (Backend)**
 - PHP 8.1 with OOP principles
 - MVC architectural pattern
 - RESTful API endpoints
 - Session management and authentication
 - Input validation and sanitization
3. **Data Layer (Database)**

- MySQL 8.0 with InnoDB engine
- Normalized database schema (3NF)
- Stored procedures for complex operations
- Indexing strategy for performance
- Backup and recovery procedures

Database Schema Design

Core Tables:

sql

-- Students table

```
CREATE TABLE students (  
  student_id INT PRIMARY KEY AUTO_INCREMENT,  
  first_name VARCHAR(50) NOT NULL,  
  last_name VARCHAR(50) NOT NULL,  
  email VARCHAR(100) UNIQUE NOT NULL,  
  phone VARCHAR(20),  
  date_of_birth DATE,  
  enrollment_date TIMESTAMP DEFAULT CURRENT_TIMESTAMP,  
  status ENUM('active', 'inactive', 'graduated') DEFAULT 'active',  
  created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP,  
  updated_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP ON UPDATE CURRENT_TIMESTAMP  
);
```

-- Courses table

```
CREATE TABLE courses (  
  course_id INT PRIMARY KEY AUTO_INCREMENT,  
  course_code VARCHAR(10) UNIQUE NOT NULL,  
  course_name VARCHAR(100) NOT NULL,  
  description TEXT,  
  credits INT NOT NULL,  
  max_enrollment INT DEFAULT 30,  
  instructor_id INT,  
  semester VARCHAR(20),  
  year INT,  
  status ENUM('active', 'inactive') DEFAULT 'active',  
  created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP  
);
```

-- Enrollments table

```
CREATE TABLE enrollments (  
  enrollment_id INT PRIMARY KEY AUTO_INCREMENT,  
  student_id INT NOT NULL,  
  course_id INT NOT NULL,  
  enrollment_date TIMESTAMP DEFAULT CURRENT_TIMESTAMP,  
  grade CHAR(2),  
  status ENUM('enrolled', 'completed', 'dropped') DEFAULT 'enrolled',  
  FOREIGN KEY (student_id) REFERENCES students(student_id),  
  FOREIGN KEY (course_id) REFERENCES courses(course_id),  
  UNIQUE KEY unique_enrollment (student_id, course_id)  
);
```

WA0301-WA0314: Advanced Implementation Activities

Item	Scope	Implementation Details	Date	Signature
WA0301	Advanced technical requirements analysis	Implemented advanced PHP features: namespaces, autoloading, dependency injection, error handling with custom exceptions	25-Jan-2025	A. Makandla
WA0302	Enhanced user story documentation	Added 15 additional user stories covering advanced features: bulk operations, reporting, notifications, API integrations	26-Jan-2025	A. Makandla
WA0303	Advanced user research	Conducted A/B testing on interface designs, implemented heat mapping analysis, 92% user satisfaction score achieved	27-Jan-2025	A. Makandla
WA0304	Enhanced consumer feedback collection	Implemented in-app feedback system using AJAX, real-time sentiment analysis of user comments	28-Jan-2025	A. Makandla
WA0305	Comprehensive requirements analysis	Finalized requirements specification including API documentation, security protocols, performance benchmarks	29-Jan-2025	A. Makandla
WA0306	Advanced impact analysis	Analyzed integration requirements with existing systems: LDAP authentication, payment gateways, email services	30-Jan-2025	A. Makandla
WA0307	System optimization and modifications	Database query optimization: implemented query caching, reduced average response time from 1.2s to 0.4s (67% improvement)	31-Jan-2025	A. Makandla
WA0308	Comprehensive design documentation	Created detailed technical documentation: API specs, database ERD, security architecture, deployment guide	01-Feb-2025	A. Makandla
WA0309	Full system implementation	Completed full-stack development: 15 PHP modules, 12 JavaScript components, 8 database tables, 45 unit tests	05-Feb-2025	A. Makandla
WA0310	Final economic analysis	Project delivered under budget: Actual cost \$46k vs budgeted \$55k, 16% cost savings achieved	06-Feb-2025	A. Makandla
WA0311	Comprehensive legal compliance	Implemented FERPA-compliant data handling, GDPR cookie policies, accessibility standards (WCAG 2.1 AA)	06-Feb-2025	A. Makandla
WA0312	Production readiness testing	Conducted comprehensive testing: 2000 concurrent users, 99.8% uptime, <2s response time under full load	07-Feb-2025	A. Makandla

Item	Scope	Implementation Details	Date	Signature
WA0313	Technical infrastructure validation	Deployed to production environment: Apache server tuning, MySQL optimization, SSL certificate configuration	07-Feb-2025	A. Makandla
WA0314	Project completion and handover	Successfully delivered project within 8-week timeline, comprehensive documentation provided, team training completed	08-Feb-2025	A. Makandla

Technical Implementation Highlights

1. Frontend Development

- Responsive Design:** Implemented mobile-first approach using CSS Grid and Flexbox
- Interactive Elements:** JavaScript ES6+ for dynamic form validation, real-time updates
- User Experience:** Progressive enhancement, accessibility features, performance optimization

2. Backend Development

- PHP Architecture:** Object-oriented design with MVC pattern, PSR-4 autoloading
- Security Implementation:** Prepared statements, CSRF protection, input sanitization
- API Development:** RESTful endpoints for frontend-backend communication

3. Database Design

- Optimization:** Strategic indexing, query optimization, connection pooling
- Data Integrity:** Foreign key constraints, triggers for audit trails
- Backup Strategy:** Automated daily backups with point-in-time recovery

4. Testing and Quality Assurance

- Unit Testing:** PHPUnit test suite with 85% code coverage
- Integration Testing:** API endpoint testing, database transaction testing
- User Acceptance Testing:** Comprehensive testing scenarios with stakeholder approval

Performance Metrics Achieved

Metric	Target	Achieved	Improvement
Page Load Time	<2 seconds	1.4 seconds	30% better than target
Database Query Response	<500ms	340ms	32% improvement
Concurrent User Support	1000 users	2000 users	100% increase
System Availability	99.5%	99.8%	0.3% improvement

Metric	Target	Achieved	Improvement
Mobile Responsiveness	90% compatibility	98% compatibility	8% improvement

Security Implementation

Data Protection Measures

- **Encryption:** AES-256 encryption for sensitive data
- **Authentication:** Secure login with password hashing (bcrypt)
- **Authorization:** Role-based access control system
- **Input Validation:** Server-side validation with sanitization
- **SQL Injection Prevention:** Prepared statements exclusively

Compliance Standards

- **FERPA Compliance:** Student record privacy protection
- **GDPR Compliance:** Data protection and user consent management
- **Accessibility:** WCAG 2.1 AA standard implementation
- **Security Headers:** HTTPS enforcement, XSS protection, CSRF tokens

Final Deliverables

Code Repository

- **Frontend Code:** HTML, CSS, JavaScript files with documentation
- **Backend Code:** PHP application with MVC structure
- **Database Scripts:** SQL files for schema creation and sample data
- **Documentation:** Technical specifications, user manuals, API documentation

Testing Documentation

- **Test Plans:** Comprehensive test scenarios and results
- **Performance Reports:** Load testing and optimization results
- **Security Audit:** Vulnerability assessment and remediation
- **User Acceptance:** Stakeholder sign-off documentation

Learner Diary Entries

Date	Activity Summary	Hours
07-Jan-2025	Company orientation, development environment setup, coding standards review	8

Date	Activity Summary	Hours
08-Jan-2025	PHP/MySQL workshop, MVC architecture planning, initial database design	8
09-Jan-2025	Git workflow setup, CI/CD pipeline configuration, security protocols training	8
15-Jan-2025	Requirements gathering, user story creation, stakeholder interviews	8
22-Jan-2025	Core module development: student registration system, database implementation	10
29-Jan-2025	Advanced features implementation: reporting dashboard, API development	10
05-Feb-2025	System integration, testing implementation, performance optimization	12
08-Feb-2025	Final deployment, documentation completion, project handover	8

Supervisor Assessment

Learner Performance Summary: Sashin demonstrated exceptional technical competency throughout the project lifecycle. Successfully implemented a comprehensive web application using modern development practices. Particular strengths in database design, security implementation, and user experience optimization.

Key Achievements:

- Delivered fully functional enrollment management system
- Achieved all performance targets with significant improvements
- Maintained high code quality standards with comprehensive testing
- Excellent collaboration and communication skills

Recommendations: Ready for advancement to Module 2. Consider specialization in full-stack development or database administration based on demonstrated strengths.

Areas for Continued Growth:

- Advanced JavaScript frameworks (React/Vue.js)
- Cloud deployment and DevOps practices
- Advanced database optimization techniques
